How do you perceive the potential economic impact of the Lara Waste to Energy Development on your business and the local Geelong economy?

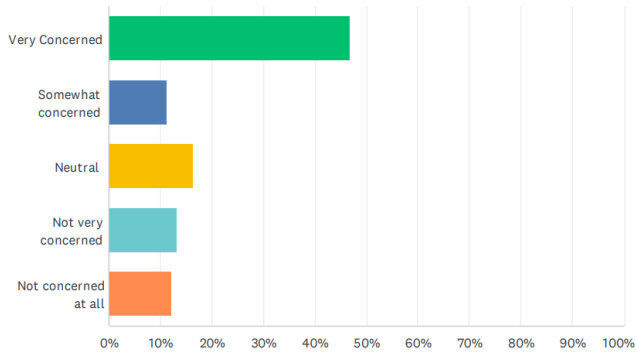

How concerned are you about the environmental and health impacts (eg. air quality, noise) associated with the Waste to Energy facility?

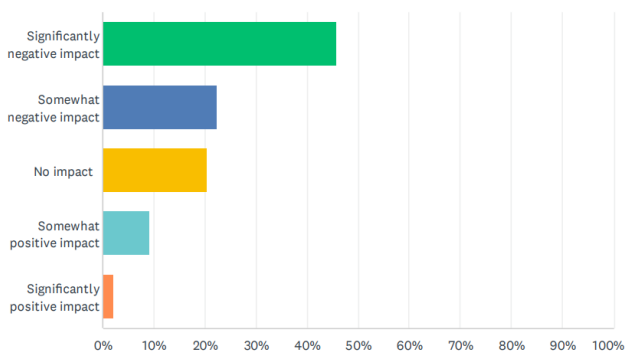

To what extent do you believe the proposed location of the waste incinerator aligns with Geelong's vision as a UNESCO City of Design and its reputation as a vibrant, progressive community?

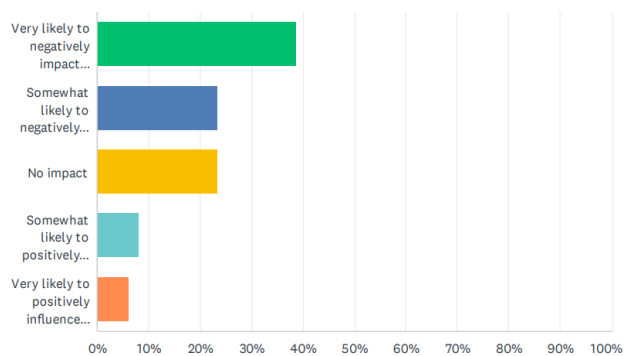

How concerned are you about the visual impact of the proposed waste incinerator (eg. 80m chimney) on the region's entrance and overall image?

In your opinion, how might the location of the waste incinerator in a fast-growing residential corridor affect Geelong's housing and workforce development potential?

Given Geelong's strategic focus on attracting international investment and tourism, how likely is the proposed incinerator to influence future business and visitor perceptions of the region?

Would you support relocating the waste incinerator project to a less visible and less residentially dense area to better align with Geelong's long term urban and economic development goals?
